

The background is a dark navy blue space scene. It features several yellow stars of different sizes, some with long, bright trails. There are two constellations depicted with thin white lines connecting their stars. Two planets, resembling the Moon with dark grey craters, are positioned in the corners. Two light blue rockets with yellow and white stripes are shown in flight. A large, white, irregularly shaped banner with a dark blue and yellow border is centered on the slide.

PROJECT PRESENTATION

By Sumaia Bintey Ismail

PROJECT PREVIEW

Welcome everyone! My project is about Drugs.com, which focuses on enhancing the user experience of a trusted healthcare resource. We've reimaged the design with a clean and modern interface, making it easier for users to find essential information about medications, conditions, and interactions. My goal was to create a responsive, visually appealing layout. Throughout this process, I prioritized simplicity, functionality, and alignment with Drugs.com's core mission: empowering users with reliable, accurate, and easy-to-access healthcare information.

The slide features a dark blue background with a white rectangular frame. The frame is decorated with space-themed illustrations: a light blue rocket with a checkered pattern is in the top-left corner; a large, cratered blue planet is in the top-right corner; another cratered blue planet is in the bottom-left corner; and a light blue rocket is in the bottom-right corner. Numerous yellow stars of various sizes are scattered throughout the background and around the frame.

INSPIRATION IGNITED

This project idea was inspired by a boot camp I attended a month ago, organized by "GP Accelerator-Jelay Jelay Uddokta." A team there presented a brilliant concept of creating a website that provides comprehensive information about medicines. Their unique and impactful idea motivated me to take on this project and explore the potential of creating a platform that offers valuable medicinal insights to users.

PROJECT GOALS

- Enhance User Experience
- Improve Accessibility
- Simplify Navigation
- Integrate Mobile App Features
- Promote Reliability
- Foster Engagement

FEATURES

- Comprehensive Drug Information
- Pill Identifier
- Interaction Checker
- Trending Searches
- Mobile App Integration
- Login Approvals
- Discounts, Offers and many more

HELPING SITES

- Drugs.com
- Apna College and GreatStack
You Tube Channels
- OpenAI
- Google
- Bootstrap.com

Find Drugs & Conditions

Enter a drug name, condition, pill imprint, etc.

Drugs.com provides accurate and independent information on more than 24,000 prescription drugs, over-the-counter medicines and natural products. This material is provided for educational purposes only and is not intended for medical advice, diagnosis or treatment. Data sources include Micromedex (updated 2 Dec 2024), Cerner Multum™ (updated 8 Dec 2024), ASHP (updated 10 Dec 2024) and others.

CONCLUSION

Inspired by innovative ideas and driven by the need for accessible healthcare solutions, this platform reflects the dedication to enhancing the way people engage with critical medicinal information.
